PMI-SVC PMO Forum Monthly Meeting

Transition/Change Management Process: A Structured Approach to TCM

Wednesday, March 24, 2010, 12:00 to 1:00 PM

**Sacramento County Office of Communications and
Information Technology**

799 G Street, 2nd Floor Large Conference Room (Room 221)

(Please bring a picture id)

Transition/Change Management (TCM) is a proven approach for executing change initiatives from vision and definition through implementation. Using the TCM methodology can help build support for new initiatives, identify hidden resistance to change, and enable you to become more successful at leading change within your organization.

This presentation will address:

- **Critical elements and building blocks of successful change**
- **TCM process steps and key elements/activities**

Our Presenter:

Barry Vroom is a Consultant and Trainer for Continuity Consulting Inc. and has over 17 years of experience managing and supporting a variety of multi-million dollar global I.T. initiatives in the areas of project management, organizational change, and business process reengineering. He has successfully led a number of change initiatives in both the public and private sectors utilizing the TCM methodology to support the creation of new divisions, corporate acquisitions, and a variety of business and IT related projects. He is a certified Project Management Professional (PMP) by the Project Management Institute (PMI), certified in Change Management Methodologies by the Prosci Research Institute, and a certified Information Technology Service Manager Master by the Information Technology Infrastructure Library (ITIL) Certification Management Board (ICMB).

The **PMI-SVC PMO Forum** is intended for anyone involved with or interested in Project Management Offices. We require no reservations, we charge no fees, PMI membership is not required, and the atmosphere remains informal to encourage two way conversations during the presentations. Attending a PMI-SVC PMO Forum is worth One (1) PDU.
